

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1.-10. (Cancelled)

11. (New) A method for inducing fibrinolysis or thrombolysis, for increasing recalcification or immunostimulation, or for reducing blood pressure in a stent implantation area of a blood vessel treated by angioplasty, said method comprising

implanting to a subject in need thereof a stent having a surface at least in part covered with a cladding, wherein said cladding consists of a liposome destabilase complex so as to obtain a release of a substance having both anticoagulating and immunomodulating properties, wherein said liposome destabilase complex is obtained by

purifying the liposome destabilase complex from medicinal leeches using an affinity chromatographic column comprising 6-keto-prostaglandin antibodies and

eluating the purified liposome destabilase complex using a high ionic strength solution.
